visceral manipulation - neuroendocrine effects: **COLON, HEART AND KIDNEYS** **RELATIONSHIP WITH THE VAGUS NERVE**

More than 40 years ago Jean-Pierre Barral and Paul Mercier started a new modality of manual therapy, called VISCERAL MANIPULATION. They were able to give new dimensions to an approach which already had its roots in the work of the pioneers of osteopathy, in the practices of early bonesetters and in methods that healers of various cultures had developed over a long period of time. Barral has published several VISCERAL, NEURAL and VASCULAR MANIPULATION books and now expands on these concepts and original techniques. This DVD introduces new ways of how to work with organs so that these interventions also effect the neuroendocrine regulation of the digestive system.

Barral introduces each technique with genuine anatomical drawings. The anatomical introductions and conceptual explanations are followed by a practical demonstration of each treatment.

An innovative approach is presented in theory and practice. The three DVDs describe the neuroendocrine effects of Visceral Manipulation in relation to the following organs and related anatomical structures:

- the peritoneum and the greater omentum
- the diaphragm
- the stomach, duodenum, liver, gallbladder and pancreas
- the small intestine and colon
- the osteopathic approach to high blood pressure via manual treatment of the vagus nerve

Peter Schwind and Christoph Sommer - the producers of this DVD - have been studying Jean-Pierre Barral's concepts and techniques for more than 25 years. They are the founders of the MUNICH GROUP for Interdisciplinary Manual Treatment (www.munich-group.com), dedicated to teach Jean-Pierre Barral's concepts and related manual modalities. Peter and Christoph are instructors at the MUNICH-GROUP and at the Barral Institute (www.barralinstitute.com) and work in private practice in Munich (Germany).
